INDEX.

ACHROMATIC CONDENSER and its use as an apertometer, The Aplanatic and, 310
Adams, Lionel E., 25, 70, 150
" Adon " telephoto lenses, 107
Aeroplanes and weather, 387
Agama, Habits of the, 394
Air, Winds in the free, 269
Alexander, P. J., 453
Albedoes and brightness of the Planets, The, 17
Albert, The Planet, 306
Alchemical Society, The, 114, 450
Alcohol as a motor fuel, Use of, 182
Alga, A rare, 101
Algae as rock-formers, Calcareous, 430
——, Evolution among lowly forms, The, 201
Alkaline water on lead, Action of, 463
Alkaloids in plants, The formation of, 463
Allen, Immo S., 373
Amateurs, Stellar photography for, 449
America, Early man in South, 347
Amphibian skin, Poison of, 435
Analysis, Luminescence, 100
Andromeda Nebula, Parallax of the, 264
—— ——, The, 461
Angiosperms, Recent research on embryology of, 383, 426
Animal life of Blakeney Point, Some notes on the, 132
Animals, Hairs of, 283
——, Manganese in, 187
Anlacodiscus kittonii—An apology, 433
Announcements, 213
Antarctic Echinoderms, Parental care among, 67
—— Lichens, 265
Antoniadi, E. M., 193, 288
Ants and caterpillars, Commensalism of, 392
Apertometer, The aplanatic and achromatic condenser and its use as an, 310
Aperture to power in the microscope objective, On the relation of, 63, 102, 148, 189
Aplanatic and achromatic condenser and its use as an apertometer, The, 310
Apparatus, A new photo-micrographic,349
Argentine, Oven birds in the, 149
Argon and its place in Nature, 307
Arran, A Riebeckite rock from, 146
Arsine, Micro-organisms producing, 463
Asama-Yama (Japan), The recent eruptions of the, 94
Ashton, Percival J., 334
Astronomy Notes, 17, 59, 97, 143, 179, 217, 264, 305, 344, 383, 425, 460
——, The new, 114, 243
Atkinson, A., 288
Atlantic, January, 1913, Storms on the, 220
Atom, The birth of an, 145
Atomic weight of Chlorine, 464
Atmospheric turbidity of 1912, 269
Auroral expedition to Bossekop in the spring of 1913, On an, 263
Australia, Discovery of a Comet in South, 179
Australia, Land crayfishes of, 393
Australites, 308, 409
Auxetic action on spores of a new species of *Polytoma*, 109
Azolla, Massulae of, 18

BACTERIA AND FUNGI, LUMINOUS, 98
——, Cytology of, 307
Bacterial nodules on leaves, 306
Bacteriology, Electrical conductivity in the service of, 204
Bacterium, A new iron, 266
Barnett, H. Norman, 253
Barograph Record, A, 68
Barometer, Garnet as a geological, 386
—— records, Lowest, 221
Bat's wing, Accessory cartilage in, 353
Bauxites of North-East Ireland, Iron-ores and, 101
Beach, The Shingle, 1
Beaches and palaeolithic man, Raised, 220
Bedrock, 332
Bee, The red-tailed humble, 161
Bees, Colour sense in, 152
——, Hermaphrodite, 392
Beetle, The cigarette, 314
Beetles and Orthoptera, Gizzard in, 276
Bellamy, F. A., 293, 334, 421
Belts on Neptune, 265
Ben Nevis Observatory, 386
Benham, Charles E., 163
Benn, Alfred W., 459
Bennett, The Rev. F., 47
Bickerton, Professor A. W., 407, 441
Biogeography of the Atlantic Isles, 267
Biological enquiry, An unbiased, 205
Biology of desert plants, 59
—— —— submerged water plants, 345
—— —— the pitcher plant *Dischidia*, 307
Bird-calling, 173
Birds assuming the plumage of the male bird, Hen, 189, 288
—— in the Argentine, Oven, 149
——, Perching in, 187
——, The Committee for the Economic preservation of, 274
——, —— existence of luminous, 321
——, —— recovery of marked, 24
Blake, A. G., 242
Blakeney Point, Some notes on the animal life of, 132
Blathwayt, Theodore B., 298
Bolivia and Peru, Natural History notes from, 152
Boron, Hybrids of, 145
Bossekop in the spring of 1913, On an Auroral expedition to, 263
Botany at the British Association, 383, 462
——, Dark-ground illumination and ultra-microscopic methods in, 361
Botany Notes, 18, 59, 98, 144, 180, 218, 265, 306, 345, 383, 426, 462
Boys' rainbow cup, Professor, 115
Brierley, Harwood, 175
Britain, Negro man in, 123
British Association, Botany at the, 383, 462
—— ——, Chemistry at the, 21, 429
—— ——, Section G, 464
Bug, A marine, 354
Bugs, Geographical distribution of bed, 354
Bulman, G. W., 161, 212, 281
Burke, John Butler, 373
Burton, James, 62, 102, 466
Butterfield, W. Ruskin, 299
Butterflies, A detail in the protective colouration of, 47

CABBAGE FLEA, VINDICATION OF THE, 26
Cairns, J. E., 154
Calcareous algae as rock-formers, 430
Calcite crystals from a water-tank, 464
Cameras, Fixed focus, 186
Campbell's " Stellar Motions," and Sir David Gill's " History of the Cape Observatory," 461
Canaries, The establishment of a race of white, 401
Cape Observatory," Campbell's " Stellar Motions," and Sir David Gill's " History of the, 461
Carbon black, The manufacture of, 101
—— Tetra-iodide, 307
Carp, A mouthless, 152
Cartilage in bat's wing, Accessory, 353
Catalepsy in *Phasmidae*, 333
Caterpillars, Commensalism of ants and, 392
Cave spiders, 276
Cavers, Professor, 18, 59, 98, 144, 180, 218, 265, 306, 345, 383, 426, 462
Cell structure and function, Modern conception of, 8
Celts and their manufacture, Polished, 210
Cephalopods, Remarkable blind, 468
Chaetopterus tubes, Commensal crustaceans in, 468
Chambers, W. F. D., 378
Chemistry at the British Association, 21, 429
—— Notes, 21, 60, 100, 145, 182, 219, 266, 307, 346, 384, 428, 463
—— of the forest, The, 367
—— —— —— silkworm, 353
Chin, The story of the, 410
Chlorides by sodium, Reduction of metallic, 100
Chlorine, Atomic weight of, 464
Chrysanthemum, Ray florets in the disc of, 409

684006

DEC 30

XUM

Cigarette beetle, The, 314
Cinematograph pictures with the microscope, Taking, 105
Circle, Squaring the, 67
——, Quadrature of the, 249
Clancey, J. C., 51
Claremont, Leopold, 124
Clays, The odour of, 61
Climate and health, 310
—— change and woodland succession, 218
Climatic changes, Volcanic dust and, 433
Cloud forms, Hourly observations of, 269
——, The velo, 349
Clouds, Violent uprushes in cumulus, 221
Clusters and nebulae, Distribution of, 461
Coal, Absorption of oxygen by, 463
——, The microscopic examination of, 347
Coalfield of Yorkshire and Nottinghamshire, The concealed, 268
Cock, A hen ostrich with plumage of a, 7
Coelenterata, Largest and stateliest of British, 314
Colouration of butterflies, A detail in the protective, 47
Colour sense in bees, 152
Colours and their changes at sunset on a tropical island, 54
Columns, Experiments on liquid drops, globules, and, 52, 121
——, Liquid, 121
Comet, A new, 383
—— in South Australia, Discovery of a, 179
——, Schaumasse's, 265
——, The orbit of Schaumasse's new, 218
——, Westphal's, 425
Comets, 233, 461
Commensalism of ants and caterpillars, 392
Condenser, An aplanatic and achromatic, 270
—— and its use as an apertometer, The aplanatic and achromatic, 310
—— tubes, Corrosion of, 429, 464
Congratulations, 265
Conjugation, Fertilisation and, 276
Contact, The power of, 163
Conversazione, The Royal Society's, 224
Copepod, A hydroid epizoic on a parasitic, 354
Copper sulphate for purifying water, Use of, 101
Correction, 350
Correspondence, 51, 67, 93, 108, 114, 155, 188, 238, 249, 252, 288, 293, 298, 317, 334, 409, 438, 458, 460
Corrosion of condenser tubes, 429
Cosmological hypotheses, 369
Cow in harness together, A horse and, 138
Crab and its borrowed shell, The hermit, 353
Crabs, Fiddler, 107
Crayfishes of Australia, Land, 393
Crocodiles' eggs, Hatching of, 394
Crommelin, A. C. D., 17, 28, 57, 59, 97, 112, 139, 143, 177, 179, 217, 225, 250, 264, 303, 305, 344, 355, 381, 383, 425, 436, 457, 460
Crustaceans in *Chaetopterus* tubes, Commensal, 468
Crystals and X-rays, 185
—— from a water-tank, Calcite, 464
Ctenophores, 26
Cuckoo, The, 24
Cumulus clouds, Violent uprushes in, 221
Curator, A provincial, 15, 155
Cyclone, Hurricane, typhoon, and, 309
Cytisus adami, The graft hybrid, 145
Cytology of bacteria, 307

DARK-GROUND ILLUMINATION, 148
—— —— illuminator, A, 102
Darling, Chas. R., 52, 121
Dartmoor, Geology of, 101
Davison, Charles, 94
